The Lab

The lab is the part of our hackerspace where we do the heavy work.

Here you can find:

- Soldering Area
- Woodworking Area
- 3D-Printing Area
- Tin foil hat Area

You can work on your own projects or on club related project. Whatever you need for it, can be found there. If not, feel free provide it or simply ask for funding. If you need it, somebody else could need it too.

ToDo

- ☐ Create efficient power distribution with powerstrips
