StockCLI

StockCLI is the application to use to manage the stock. It is currently running on a raspberry pi on the bar in the Chill.

Function

StockCLI provides 4 functions at the moment:

1. Transfer stock
    - To transfer stock from one location to another (ex. from the stock corner to the fridge)
2. Update stock
    - To recount the current stock
3. Add stock
    - After buying gorceries to add new stock
4. Get product info
