ChaosStuff

ChaosStuff is C3L's very own Hackerspace in the heart of Luxembourg City! We welcome hackers, makers and any other living being or AI, whom identifies her/himself/itself with our values and especially the hacker ethics! Special note for intelligence officers: you're only welcomed if you switch to our side - for real. :)

Stuff in **ChaosStuff** (spoken ''/kaːos ʃtuf/'') is Luxembourgish and actually means the parlour or living room.

See our Infrastructue page to get more information on the tools we provide!

How to get there!

The ChaosStuff is easy accessible by various means of transportation.

Impressions

Physical Access Keys

Two rooms. Two keys. If you'd like to have them, please get in touch with info@c3l.lu or pop by at a ChaosMeeting. Owning only one key and still being able to access both rooms is possible. Both rooms are in possession of the respective key of the other room. One key on the keyring means less weight for you and less probability to lose the second one. The choice is yours.

Process

1. Become/Be a member of the association.
2. Put in a key request query to the SpaCo, supplying 'read and approved' and signed copies of the follwing documents:
    1. Statutes
    2. Guidelines
3. SpaCo will get in touch, after your request has been fully reviewed.
4. If your request is granted, a key deposit of 10€/key must bed paid.
5. To conclude, your username will be put down in the official key owner registry.

Kitchen

There is a full-featured kitchen provided to all members and visitors of the ChaosStuff. For those whom don't like / have time / don't have to much trust in their cooking skills, there are several - tested by us - delivery-services nearby. For those who are up for a cooking challenge, visit our Foodhacking list.

Space Commission

The Space Commission (SpaCo) is a group of 5 people whom have volunteered for the task of managing ChaosStuff as facility.

Guidelines

There exist a guideline for using our Hackerspace. Yes we encourage creating a TAZ (Temporary Autonomous Zone) but when a bunch of hackers come together and as everyone has a different point of view what "cleaning" and being "excellent" to each other means - this seemed necessary.
