### ChaosStuff Log

#### Wiki Updates

The wiki no longer load resources from external sources (i.e. cloudflare). We use the MathJax plugin, that normally loads it's javascript files from a CDN. To fix this, we now provide the files ourselves.

#### Soldering Area

The soldering area got new tools, please take care, when using them:

- Lamp with magnifying glass
- Brass Soldertip Cleaner
- Solder Fume Extractor
- Solering Tin Holder
- Cablerolls Holder
- Solder Pump (a better one)
- Antistatic mat
- Antistatic wristband
- Grounding Receptacle

### Matrix SpaceApiBot

We have now a dedicated Matrix SpaceApiBot. It can do all the same things, as the XMPP one. It just doesn't connect to the MUC channel, as this is handled by the XMPP bot.

To use it just chat with `@spaceapibot:matrix.c3l.lu`.

### stockcli

The raspberrypi on the bar is now used for the stockcli application. With this, the SpaCo can manage the stock (i.e. transfering, add, updating etc...). In the future it should also be able to handle the library.

### Membershipform

The membershipform now accepts also SatisPay and the Payconiq/DigiCash feature was updated to the now API.

## Subsiden

## Internet

## Spaco

## Makerfaire
