Owner Info

(Gen)AI

ssh:iwzle622@iwzle622.repo.borgbase.com/.repo Generative AI is, whether we want it or not, quite present in society, including the news. **It is only a matter of time before we get asked about it, f.i. by the press.** We should discuss this topic, and write down our thoughts, as to have a coherent public stance. What lens would the press approach this with? What exactly do we need to prepare? This is a broad topic. === Random Links (food for thought) === * AI and copyright * [Europe's "Text and Data Mining" \(TDM\) exception is the legal basis for AI training](#) * German court says: "training is allowed, memorization is not", you cannot repeat a song's lyrics. * [Niche Substack article about AI nightmare scenario](#) impacts the market * Context: * fictional "memo from June 2028", imagining how the current AI boom could trigger a systemic economic crisis * core thesis: AI doesn't need to fail to cause a crisis, it just needs to succeed fast enough - AI agentic coding tools destroy SaaS (software as a service) - AI agents displace human interaction (e.g. travel booking, insurance renewal, financial advice) - Overall impact on many white-collar workers becoming redundant * **FT calls it out (and The Economist too), saying the economics of the article don't make sense**, but calls it 'interesting as a "thought-provoking example of scenario analysis"' ===== ID/Age verification ===== * Age verification through selfie or ID everywhere * Discord, Minecraft, social media, etc. * cost: data privacy, surveillance * <https://spectrum.ieee.org/age-verification> * [Friedrich Merz wants to see real names online \(heise\)](#) * [Criticism of Merz's anti-anonymity \(heise\)](#) * [Digitale Führerschäin \(education?\) instead of "interdiction des réseaux sociaux pour les moins de 16 ans"](#) * <https://www.rtl.lu/news/national/ass-dschoul-haut-scho-fit-fir-dzukunft-447439170>
