- How does one update the Meshnet.lu website? (Hugo) - orimpe
- Pi and More 14 - orimpe
- IRC Server with WebIRC and Matrix Bridge? - xbr
- Certbot to ACME.sh - xbr

## Minutes

### JOTA-JOTI

https://wiki.c3l.lu/doku.php?id=user:orimpe:private

We have decided to organize a hands-on workshop for the Scouts at the next JOTA event.

Info meshcore + devices and a presentation for the Workshop on JOTA event 2027.

orimpe gets in touch with the organizer.

https://www.jotajoti.lu/

### Update Refunding (Meshnet)

No update regarding refunding the members.

### How to Meshnet Hugo

1. Locally
    1. Make your changes locally
    2. `hugo server` to run a server where you can see your changes interactively
    3. Commit your changes & Push
2. Server
    1. `sudo -su www-data`
    2. `git pull`

3. hugo

### Pi and More 14

We're drumming up a bit more publicity for Pi and More 14

https://piandmore.de/de/

### IRC Server with WebIRC and Matrix Bridge

We could run Ergo IRCd, which is a single IRC server with no network capability, but it has history support.

With a web IRC client like gamja, we could have a public channel that's accessible to new potential members, without having the bar of Matrix, XMPP or Mail.

Example web IRC from Ergo's demo server: https://ergo.chat/gamja/

### Certbot to ACME.sh

xbr moved away from certbot on various servers towards acme.sh, which makes maintenance easier.

virii has to setup the MQTT cert himself, so the refresh command may be broken.
