Projects

Projects are a vital part of an association's life. Hackers have lots of ideas, but time is not an infinite resource. So, think wisely about what ideas you would like to realize and try to inspire some other fellow members putting them to life.

On the other hand, we'll be straight forward with you, are the financial resources. These aren't for most NGOs infinite too. So, if you have the possibility to donate to your favourite project or just to all of them, please consider doing so.

Highlights

YaB

Freifunk

SETI Box

Command & Control
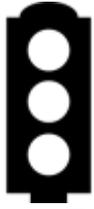

Hardware

Tor Hotspot

Molecular Construction Device aka. 3D Printing

Weather station

Lockpicking

Smarter Traffic Light

Skynetbot aka. self learning robot

PSU Hacking

Jabel

**Facuum**

Decoration

Game of Life

MQTT Lights

Food & Inventory & Stuff

Foodhacking

Hydroponic

poteen

Retro gaming

Community

Cypherpunk

Photo Nerds

entr0py Encore

Repair Café

Education

Encryptia

Wearables

Neopixel Goggles

Neopixel Respirator

Misc

- Besides project documentations, we also provide HowTo's to elaborate specific steps.
- The only barrier is your imagination. Scribble down the blueprints in the pool of ideas, before you forget about them.
- Concluded or suspended projects find their new permanent or temporary resting place in the Archives.

New Project

Project Name * [   ] Status * [Planning ▼] Project Description Create project

Create a new project by simply using the form above. It loads a template with predefined values for you to complete. By this process we can assure, that all newly created project pages, kick-off with the **essential metadata** we'd like to store.
