

cryptoParty @ Carré Rotondes (Exit07)

In our opinion, a [cryptoParty](#) needs to be in a cozy place without too much of an academic touch. Meaning: there will be 30 minutes of lectures at most and the rest of the time will solely be used to answer peoples questions and show them how to safeguard their data.

CARRÉ ROTONDES

ESPACE CULTUREL

We are glad about the fact, that [Carré Rotondes](#) offered us the opportunity to host the event at their great place, which has a long story of events by activists fighting for the right cause and offers exactly the frame we were looking for!

So, if **you** are interested in how to **protect** your data and communications from curious companies and governments, [this cryptoParty](#) will be the event you **need** to attend to!

Let's hack towards a better future!
