Staatstrojaner made in Luxembourg

Let's help to make digital Luxembourg great again!
As every new project nowadays needs a fancy website, the Chaos Computer Club Lëtzebuerg took the chance and released one to promote and inform the public about the State-Trojan (because obviously the government failed to do so). Germany showed us how to introduce and "securely" deploy such software. Now our government wants to follow this brilliance by introducing a State-Trojan made in Luxembourg.

So we invite all of you to visit the official website about Luxembourg's State-Trojan:
staatstrojanermadein.lu

tl;dr
Check out our satirical website about Luxembourg's State-Trojan.
staatstrojaner, satire
