Chaosstuff Inauguration

Remember remember the 5th of November… yeah you totally should because November the 5th was the official inauguration of our Hackerspace "Chaosstuff"! A precious date for a precious event so to say.

Soldering Workshop - Soldering Arduino FOSDEM 85 kits

Speech about our club. History, Present and Future!

Our fellow Hackers actually cleaned up the two rooms, held a soldering workshop, mixed cocktails for all and made sure you won't leave hungry! We had enough visitors to DDoS the rooms capacities. I guess that was because our Hackerspace houses more than one NGO. The Chaos Computer Club Lëtzebuerg wanted to create a Hackerspace where more NGOs could gather. Currently we also house the Frënn vun der Ënn and the Repaircafé Luxembourg. More clubs = more traffic at the Inauguration. Still everything went fine and we all had a good time.

The "Labo" where we fixx broken Hardware for the Repaircafé Project

We would like to thank YOU for coming by. We hope that you found a new cool place to work on your projects and a community to share your knowledge with. More impressions of the day can be found here!

inauguration, chaosstuff, hackerspace
