- Donations and finances – virii
- Hackerspace payment method – virii
- Missing entr0py radio shows – virii
- Pool of talks – metalgamer
- Update Cert on the c3l-jabber server – orimpe

## Minutes

### ToDo

Pls use our RequestTracker.

### GA Meeting Minutes

GA minutes are not complete, due to missing information from the respective people (treasurer, secretary & president etc...)! Will be updated till the next CM.

### Digital Water Meter

```
Bonjour,

Je cherche des personnes capables de tester la sécurité d'un compteur d'eau
communicant qui est installé en NON-DISCLOSED. Connaîtriez-vous des
personnes
intéressées par ce projet ?

Cordialement
```

prometheus will get in touch with that guy. No one at the meeting had the required skills, so we will

see.

## Freifunk Luxembourg

We will come together to buy some routers and do an hackathon on buildung a Freifunk network in Luxembourg.

## Hackerspace Location

See regarding mails on the mailinglist:

```
Hi!

The vote has turned out like the following (among all participants
offline & online):

1. Zéisseng
2. Eech
3. Lampertsbierg
4. Hollerech
5. Bouneweg

If no one wants to object this and have a real life serious vote foo,
I'll get in touch with the persons in charge.

Keeping our fingers crossed.

Cheers,
J.
```

## Tiny Cryptoparty Request

The PirateParty requested to do a little cryptoparty without any presentation, only workshops.

It will be the 4th April in Wilwerwilts (very north of the country). The time will be announced on the mailinglist.

metalgamer will do an Android workshop!

## Donation and finances

We will get an official bitcoin address to also receive bitcoin donations. There will also be a wikipage, describing our financial situation.

## Hackerspace payment method

We will introduce a voucher-system. So we can gather a lot of money in advance and people don't need to carry always money. If the people buy than Mate for example, they just need to score out the respective fields.

## Missing entr0py radio shows

Fixed!

## Pool of talks

We will create a wiki page, which will also be in the sidebar. That wiki page contains a table of talks, which members can offer, so if a organisation would like to "rent" us, they can select the talks they would like to see. (This doesn't mean that people can't ask for other topics which are not listed there). The page should also mention all these things!.

## Update cert on the c3l-jabber server

metalgamre will update this soon!
