ChaosMeeting 2015/05

Date	25/04/2015
Time	19:30 CET
Location	virii's place

Agenda

- ToDo
- Freifunk – metalgamer
- Pool of talks – metalgamer
- Wifisec – metalgamer
- Name of future hackerspace – prometheus
- Division & workflow of tasks – prometheus
- Feedback #FNFTRT – prometheus
- Haus vun de Kanner Mail – prometheus
- Crossroads: what direction to head on? – prometheus
- Cooperation Carré Rotondes – prometheus
- Petition – prometheus
- Anonymous Domain name information – prometheus
- Hackerspace – prometheus
- entr0py – prometheus
- Press conference about privacy – prometheus
- Press Release regarding Survaillance Laws in France – eve

Minutes

ToDo

Pls use our RequestTracker.

Freifunk

metalgamer asked, if we could create a mailinglist only for this project. The consensus was, that we will do it over the internal mailinglist until more people are involved in this project.

Pool of talks

talks is now in the sidebar. prometheus will create a text to put on top to explain what that page is about. Everyone is encouraged to include his talks.

Wifisec

metalgamer is currently working on this. There will be a meeting, where we discuss the details. Needs still to be announced.

Name of future hackerspace

There were some suggestions for the name of our future hackerspace. At the moment the proposals are:

- Cyberdelia
- Hackbunker
- Cyberbunker
- Autonom Zone
- EOF (Electronical Ordered Freedom)
- CHE (Code, Hack & Exploit)

Suggestions can be made on a chaosmeeting or through our internal mailinglist. We decide when we have the keys.

Haus vun de Kanner Mail

prometheus asked if he could create some mailaddresses for his kids at his workplace on our mailserver for a project. The chaosmeeting was in favor.

Feedback #FNFTRT & Cooperation Carré Rotondes

- Success in terms of people who showed up
- Need more publicity (but for this event it was a little too short timed)
- Some critics we receive from the participants were too harsh (how they worded it)
- Stream was a success

Carré Rotondes gave us the next four possible dates for our cryptoparty:

- Oktober 2015
- November 2015
- March 2015
- May 2015

We decided that the next cryptoparty will take place at:

- 18 November 2015 (More basic stuff like how to create secure password etc…)
- 18 May 2015

Crossroads: what direction to head on?

prometheus will do more for C3L, as he has new ideas. Also we created a mailinglist for CRG!

Division & workflow of tasks

Example:

Who is the first person in charge to contact to get subscribed to the internal mailing list? How is this procedure implemented?

The server admins to their stuff if we have a new member. Anyone from the council can make the first contact, but should CC the mail they write to the noc mailinglist, so that the other noc members know that someone is already in contact.

Petition

There will be a pad about the petition we will write, see internal mailinglist for more information.

Anonymous Domain Name Information

The get more donations, people can make a request to us, if they can put our address information in their whois entry for their domain.

Hackerspace

All the people were in vacation, so they could not answer. We shall receive an answer by next week. We need to get an assurance for the content in our roome (like the 3D printer).

entr0py

Next topic will be Trusted Computing. Secondly we need a new name for our podcast (which we will start in June) as Bare Metal is already taken.

Press conference about privacy

We got a request to participate in a press conference about privacy, which will be 21st May. More information will follow on our mailinglist

Press Release regarding Survaillance Laws in France

Yes, eve should be the contact person for this.
