

Donations

A club can only live with members and money. C3L is no exception. Right now we have members but we lack the money to finish or even create new projects. As a club we know that if you want to attract new donations you need to provide the donor something in return. It must be visible what your donated money is used for. That's why we are now putting a donation bar on every project Wiki page. This indicates what project needs money and how much.

A simple overview of fund-able projects has now been created. So if you want to help us finishing projects or to kick-start new ones then please go ahead. Check out our [current projects](#) and decide by yourself what you want to actively support. No project found that you are interested in? [Join us](#) and launch it by yourself!

We accept Bitcoin, Ether, [cash via mail](#) and of course wire transfers!

Projects

Here's a list of projects that currently seek funding:
