Partners

Interested in what we do and want to support us? Get in touch!

C3L's independence from all entities, in order to act as objectively as possible on matters, is one of our highest goods. We're glad we have partners accepting this and supporting us.

Visual Online

Visual Online is an Internet Service Provider (ISP) and hosting company in Luxembourg. We have been first in contact with them in February 2015. Since July 2015 they are supporting our cause with a donated server at no costs.

Carré Rotondes

Carré Rotondes has offered us their infrastructure multiple times over the past few years (since early 2014).

City of Luxembourg

Thanks to the City of Luxembourg (VDL) we were able to move into our first, very **own** hackerspace, named ChaosStuff. The facilities have been offered us free of charge (incl. heating, water, electricity & cleaning). In return we provide free events like the Repair Café or offer different courses. For details, have a loot at our events page.

Radio ARA

Radio ARA gives us a spot for our monthly radio show and podcast, "entr0py". The topics we're treating are widespreaded and of all different kinds of nature; from ITSecurity to the cyberpolitical realities in all of our live, the heaviest bugfucks of the month, as the analysis of technologies in its detail.
