Press Releases

Press Releases (PKs) are either published in Luxembourgish or English language. Usually they are written in a collective effort among interested members of the Press Commission. It needs to be underlined, that if time allows, every member has the right and opportunity to take part in this effort. However, if the public relations representatives are on the clock, PKs are written and published by them.

Nonetheless, PKs are always reviewed by the public relations representatives.

All published PKs are available in our [archives](#) for review.

Press Appearances

Press Appearances (PAs) are an important way of broadcasting our views and messages to society. We try to collect and download as much of these PAs as possible, in order to document for one, our commitment to the ethics we stand for, and secondly to keep a record of our history.
