ChaosDrops

ChaosDrops are quite similar to DeadDrops, the only big difference is, that they are subscribed to the official DeadDrop list.

Hunting ChaosDrops

1. Download the chaosdrop-client.pl
2. Start it in the commandline via

```
perl chaosdrop-client.pl
```

3. Hunt 'em down! And fill 'em up!

Planting ChaosDrops

1. Read the ChaosDrops manifesto.
2. Get a USB drive of any size you see as appropriate and put **at least** the README and above mentioned manifesto on it.
3. Seek a place to place your ChaosDrop.
4. Embed your device with glue, cement, silicone or whatever into a hole, crack or what else you might see appropriate.
5. Log GPS / Galileo coordinates.
6. Submit your ChaosDrop to info@c3l.lu (Subject: ChaosDrop Submission) with the following information:
    1. Name
    2. Location Coordinates
    3. Size
