What is this project about

We provide high-bandwidth Tor nodes all over the world to protect online privacy, anonymity, freedom of speech and fight censorship!

For various reasons (legal aspects, seperate budgets and bank accounts) we created a separate organization called Frënn vun der Ënn a.s.b.l. in 2013 at the very first Cryptoparty here in Luxembourg. The name Frënn vun der Ënn is Luxembourgish and stands for Friends of the Onion. Frënn vun der Ënn a.s.b.l. is also an official torservers.net partner organization.
