public ssh keys

You will find here all public keys from the Freifunk team. If you want to, you may insert them into your Freifunk node.

There are good reasons to allow and refuse ssh access from the Freifuk team to your node. This will always be optional

Pro:

1. quicker support.
2. The Freifunk team doesn't have to be on the field to provide support or the nodes owner doesn't have to come to thehackerspace to receive support.
3. very useful for debbuging.

Kontra:

1. The Freifunk team has access to your node from all over the network.
