CNC mill

Description

An CNC mill is an machine, to create things out of raw material. You can creat PCBs, keys, figures or gravate your phone.

CNC mill crowdfunding

If we have enough money to buy one, we will buy one. for now we are thinking about one of these:

- https://othermachine.co/othermill-pro/
- http://carbide3d.com/nomad/
- http://carbide3d.com/shapeoko/
- https://www.inventables.com/technologies/x-carve
- https://www.inventables.com/technologies/carvey

Why an CNC-mill?

- You can make fast and cheap PCB prototypes, without handling chemicals.
- You can create things, like in an 3D-Printer, just with metal or wood
- You can aggravate your phones
- It is an alternative for an 3D.-Printer
