

# How to build a Pirate Radio?

## Introduction

## Parts List

Item	Quantity
Raspberry Pi	1

## Flash the SD card

Flashing the card with your favourite operating system is crucial for the radio to work, as you've probably imagined already. We recommend to install [Arch Linux](#) though. Why? Because, it's (1) light weighted, (2) well structured, (3) it has a very resourceful [wiki](#) and (4) is simply awesome.

Find the image file and installation instructions [here](#).

## PiFM

Log on to your system and download the relating software you need to transmit your messages!

```
<sxh bash> [user@hostname ~]$ wget -no-check-certificate  
https://download.c3l.lu/dlbase/scripts/Pifm.tar.gz </sxh>
```

## Increase the range

# Tuning in!
