Software

Tor

> Tor is free software and an open network that helps you defend against a form of network surveillance that threatens personal freedom and privacy, confidential business activities and relationships, and state security known as traffic analysis

Website: Tor Project

Internal: C3L and Tor

I2P

> I2P is an anonymizing network, offering a simple layer that identity-sensitive applications can use to securely communicate. All data is wrapped with several layers of encryption, and the network is both distributed and dynamic, with no trusted parties.

Website: I2P Anonymous network

JonDo

> JonDo, formerly JAP, is the ip changer proxy tool you have to install on your computer. It acts as a proxy and will forward the traffic of your internet applications multible encrypted to the mix cascades and so it will hide your ip address.

Website: JonDo

OpenVPN

> Your private path to access network resources and services securely

Website: Open Source VPN
