Copper Sulfate

The first crystals, that we are growing are copper sulfate crystals. They give an intense blue color and are quite easy to grow. For this, we need to acquire [Copper\(II\)-sulfate pentahydrate](#). The chemical formula is: $\text{CuSO}_4 \cdot 5 \text{H}_2\text{O}$

Gather your materials:

Materials

- Copper(II)-sulfate pentahydrate
- Water
- Beaker
- Glass dish
- Spoon
