What is Tor?

> Tor protects you by bouncing your communications around a distributed network of relays run by volunteers all around the world: it prevents somebody watching your Internet connection from learning what sites you visit, and it prevents the sites you visit from learning your physical location. Tor works with many of your existing applications, including web browsers, instant messaging clients, remote login, and other applications based on the TCP protocol.

Tor and you

C3L supports the Tor Project by running a bridge server and an obfsproxy for Frenn vun der Enn. Use the follwing settings to connect through the C3L server: Normal Bridge:

> Bridge 91.121.176.163:9001 0FDAA012296C1A46F5547FDD277A25EF46E2F2A2

Obfsproxy:

> Bridge obfs2 91.121.176.163:54888

Hidden Services

The C3L Blog and Downloadbase are also accessable through a hidden service!

- Blog: sjp7rukjk4ybqsnk.onion
- Dlbase: 64yjeb5w3ptnngh4.onion

Mirror

We are mirroring the Torproject (website, binarys). Have a look at torproject.c3l.lu!

Presentations

- virii did a presentation about Tor and his Orwellbox in 2011. His slides are available _here_!
- Here's a video of Jacob Appelbaum speaking at UNI.lu
