## RequestTracker

[metalgamer](#) asked to get an introduction to administrate things in the request tracker, so that [virii](#) doesn't need to do it alone. Will be done in the future.

## DNS Server

To get wildcard certificates from Let's encrypt, we need to run our DNS server. See [here](#) why. Will be done in the long future.

## Publiccode

[deflenken](#) will subscribe us to the Public Money, Public Code project.
